Public Rate Limits:	Links to public details about rate limits policies. "No" means it's not provided.
Required Registration Data:	The personal data providers ask for at account creation. **Yellow** if providers require your name. **Red** if providers require a phone number.
Privacy Policy:	Link to privacy policy. All providers have a public privacy policy.
Provider Setup (Steps Needed):	How many steps the registration takes. **Yellow** if 5 or more. **Red** if users need to continue at some later date.
Delta Chat Setup (Steps Needed):	How many steps the Delta Chat setup takes. **Yellow** if more than one step. **Red** if six or more steps.
Provider Migration (Auto Forward):	If users can forward incoming mail to a different account. **Red** means that providers lock-in users, e.g. through required payment.
Attachment Size:	Limits to attachment size. 36MB is the limit set by Delta Chat. **Yellow** if less than 30MB.
Speed:	How many seconds it takes to deliver a 10KB test message. **Yellow** if more than 10 seconds. **Red** if more than 60 seconds.
IMAP Features:	Supported IMAP features which are important for Delta Chat usability. **Yellow** if available (Q)uota isn't shown. **Red** if push notification via (I)dle is missing and/or unread state can't be synchronized between devices with (C)ondstore.
Q C I:	**Q**: QUOTA, **C**: CONDSTORE, **I**: IDLE. Different IMAP Features which a server must support so Delta Chat provides the best possible user experience.
Interoperability (Send):	Percent of tested providers which could be reached. **Yellow** means that the provider is blocked by some providers. **Purple** means that the provider made testing impossible through automated spam detection.
Interoperability (Receive):	Percent of tested providers which weren't blocked. **Yellow** means that the provider blocks some other providers. **Purple** means that the provider made testing impossible through automated spam detection.
